

Bridgewater State College John Joseph Moakley Center

Bridgewater, MA

Key Project Information

Type:	New Construction
Project Size:	46,800 SF
Market Segment:	College/University

The John Joseph Moakley Center for Technological Applications is a regional center dedicated to the development, application, and dissemination of applied technologies for teaching. The new facility is part of a larger Bridgewater State College campus project including a satellite receiving station and a new campus computer network providing all buildings on campus with full access to computer services, TV, and other related electronic services.

The building houses lecture halls, a computer laboratory, professional level television production studio, research and development facilities, exhibition spaces, and classrooms with a variety of features designed to allow for the application of technologies to learning and teaching.
